ISUZU

ABOUT US

Over the years, our journey in the off-road industry has been evolutionary. What began in a small factory crafting custom, one-of-a-kind items has evolved into our current state—a fully-fledged facility dedicated to supplying off-road parts and accessories.

Despite the expansion and increased production, our quality has remained a key focus in all our work. This commitment to quality has been the cornerstone of our growth, ensuring that each component we produce maintains the integrity and craftsmanship that defines our brand.

With a wealth of experience in remote travel and over 15 years dedicated to designing and constructing these unique vehicles, we possess the assurance in our skills and expertise to actualise your visions.

As a family-owned and operated business, we deeply grasp the significance of support and community.

Therefore, our commitment is to offer you unparalleled attention and assistance throughout your journey, from the initial purchase to the realization of your concept into a finished product, and even beyond that.
